Experiment5: Write a shell script to perform the following string operations:

(A) To extract a sub-string from a given string.

   Command: nano filrname.sh

  Script: $var

        var= "Hello welcome to MIET"

        echo $var

        echo ${var:2:8}

```
ubuntu@ubuntu2004:~$ nano exp5.sh
ubuntu@ubuntu2004:~$ cat exp5.sh
$var
var="hello welcome to miet"
echo $var
echo ${var:2:8}
ubuntu@ubuntu2004:~$ ./exp5.sh
hello welcome to miet
llo welc
```

(B) To find the length of a given string.

    Command: nano filename.sh

    Script: $var

        var= "welcome to MIET"

        echo ${#var}

```
┌──(aakash㉿kali)-[~]
└─$ nano exp5.sh

┌──(aakash㉿kali)-[~]
└─$ chmod +x exp5.sh

┌──(aakash㉿kali)-[~]
└─$ sh exp5.sh
15

┌──(aakash㉿kali)-[~]
└─$ cat exp5.sh
$var
var="welcome to miet"
echo ${#var}
```
